PROFILE

Full Stack Developer specializing in MERN stack (MongoDB, Express.js, React.js, Node.js) with strong expertise in JavaScript, Tailwind CSS, HTML, and CSS. Skilled in building scalable, high-performance web applications with hands-on experience in AWS (EC2, S3), Redis, and RESTful API development.

EDUCATION

Rashtrasant Tukadoji Maharaj Nagpur University
Bachelor of Engineering in Computer Science

Nagpur, India
2018 – 2022

SKILLS

Language: JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB

Cloud & Tools: AWS (EC2, S3), Redis, Git, GitHub, Postman, REST APIs, NPM, VS Code

CERTIFICATION

- Full Stack Development from 10x Academy ([link](#))

Hyderabad, India
07/2022 – 12/2022

EXPERIENCE

Pinaca Technologies Pvt Ltd
Software Engineer

Mumbai, India
04/2026 – Present

- Established scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB (MERN stack).
- Designed and formed RESTful APIs for seamless integration between frontend, backend, and ML microservices.
- Integrated AI-based computer vision pipeline (ANPR) using Python, OpenCV, and OCR for real-time number plate detection.
- Built responsive and interactive dashboards using React.js and Tailwind CSS, improving data visualization and user experience.
- Optimized backend performance and data flow, reducing API response time and improving system efficiency.
- Followed microservices architecture to ensure scalability, modularity, and maintainability.
- Collaborated in an Agile environment, contributing to sprint planning, debugging, and feature enhancements.
- Enforced clean code practices and version control using Git, ensuring efficient team collaboration.

Techpose India Pvt Ltd
Software Developer

Hyderabad, India
05/2023 – 01/2026

- Built and deployed full-stack web applications using MERN stack, improving system scalability and performance.
- Orchestrated secure RESTful APIs for authentication, vendor management, and booking workflows.
- Created responsive UI components using React.js, enhancing cross-device compatibility and user experience.
- Configured database schema design and streamlined MongoDB queries, improving data retrieval efficiency.
- Worked on end-to-end feature development, from requirement analysis to production deployment.
- Deployed applications on AWS (EC2, S3) ensuring high availability, reliability, and scalability.

PROJECTS

AI-Based CCTV Analytics System with ANPR Integration

04/2026 – Present

- Architected a full-stack CCTV analytics platform using MERN stack with Python-based ANPR microservice.
- Programmed computer vision pipeline using OpenCV and Tesseract OCR for real-time vehicle number plate detection.
- Engineered scalable backend APIs using Node.js and Express.js to process video data and store structured results in MongoDB.
- Built a responsive dashboard using React.js and Tailwind CSS to display detection results with images, timestamps, and confidence scores.
- Generated dynamic data retrieval system simulating RTO integration for vehicle details with fallback handling.
- Applied microservices architecture for separation of ML processing and backend services, improving scalability.

Indian Extracellular Vesicles Society (IEVS) Platform

01/2024 – 10/2025

- Developed and maintained a professional event and membership platform with dynamic content and user workflows.
- Simplified features such as event listings, registrations, and user interactions with improved UI/UX.
- Integrated backend services and APIs to manage event data, memberships, and communication workflows.
- Deployed scalable web solution ensuring performance and accessibility.

Gullakaari 2.0 – E-commerce Platform

05/2023 – 01/2026

- Built a full-stack e-commerce platform with product listings, filtering, and user interaction features.
- Crafted a responsive frontend using React.js and integrated backend APIs for seamless data flow.
- Implemented dynamic product management and boosted performance for better user experience.
- Enhanced platform usability with structured workflows and scalable architecture.

ACHIEVEMENTS

- Successfully delivered multiple production-ready web applications.
- Consistently recognized for problem-solving and delivering reliable solutions under tight deadlines.
- Successfully enabled AI-integrated full-stack solutions.
